

The screenshot displays the Node-RED web interface. At the top, the Node-RED logo and a 'Deploy' button are visible. The main workspace is a grid where a flow named 'Flow 1' is being edited. The flow contains two function nodes, labeled 'function 1' and 'function 2', connected in a vertical sequence. The left sidebar shows a list of nodes categorized under 'common' and 'function'. The right sidebar provides information about the selected flow, including its name 'Flow 1' and a unique ID 'f1c1c6da2742a415'. Below this, there is a section for enabling or disabling tips from the settings.
